TOWN OF NORTH HEMPSTEAD

JUDI BOSWORTH, SUPERVISOR

ADOPTED CAPITAL PLAN

FISCAL YEARS 2014 THROUGH 2018

TOWN OF NORTH HEMPSTEAD ELECTED OFFICIALS

Judi Bosworth
Supervisor

Wayne H. Wink Jr.
Town Clerk

Charles Berman Receiver of Taxes

Viviana L. Russell Councilwoman, Dist. 1

Peter J. Zuckerman Councilman, Dist. 2

Angelo P. Ferrara Councilman, Dist. 3

Anna M. Kaplan Councilwoman, Dist. 4

Lee R. Seeman Councilwoman, Dist. 5

Dina M. De Giorgio Councilwoman, Dist. 6

TOWN OF NORTH HEMPSTEAD

LIST OF COMMISSIONERS, DEPARTMENT HEADS & SENIOR STAFF

Elizabeth Botwin - Town Attorney Cindy Cardinal - Chief of Staff Nick Guariglia - Director of Legislative Affairs Aline Khatchadourian - Director of Finance Robert Troiano - Director of Operations Carole Trottere - Director of Communications

Kimberly Corcoran - Commissioner of Community Services
Kevin Cronin - Building Department Commissioner
Andrew DeMartin - Commissioner of Public Safety
Paul DiMaria - Commissioner of Public Works
Jennifer Fava - Commissioner of Parks
Peter Hoda - Commissioner of Administrative Services
Michael Levine - Commissioner of Planning
Caisy Meyers - Commissioner of Services for the Aging
Kathleen Mitterway - Comptroller
Frank Prisciandaro - Commissioner of IT & Telecommunications
Igor Sikiric - Commissioner of the Solid Waste Management Authority
Tom Tiernan - Superintendent of Highways
Bob Weitzner - Commissioner of Finance

 $\underline{Note:}$ All money available figures on the following pages are as of April 22^{nd} , 2014 Town of North Hempstead Cross Fund reports.

The proposed Capital Plan was developed in conjunction with the Town Board's Capital Plan work session held on April 28, 2014.

INTRODUCTION

The Town of North Hempstead's spending on capital projects - from road repaving to repairing Town-owned facilities to improving our parks—is planned separately from the Town's operating budget. The Capital Plan presents a blueprint for the Town's investments in the future and how we plan to fund them.

During the capital planning process, the Plan will always remain transparent and open. To this end, we will be conducting a work session with the Town Board to review the projects laid out in the Capital Plan. Everyone will have an opportunity to give their input before the scheduled May 13 vote.

As your Town Supervisor, I am committed to making capital improvements for our future, while also balancing the need to be fiscally conservative. The costs outlined in this document are preliminary estimates and every effort will be made to find lower options when available and to maximize grant funding, without compromising the quality of our projects.

The implementation and development of key initiatives in our Capital Plan are needed to maintain the quality of life our residents expect and deserve. Through improvements in infrastructure, enhancements of our parks system, preservation of Town history, advancing clean water initiatives and ensuring our public safety, we will be able to better serve the needs of North Hempstead's residents.

INFRASTRUCTURE

Infrastructure has a direct impact on the economic health and safety of our Town's residents. It's never good policy to ignore infrastructure problems today and to pass these problems along to future generations. I believe that once a local government lets its aging infrastructure deteriorate, the costs to fix it grow exponentially.

This plan proposes to improve our aging infrastructure by repaving Town roads, repairing and rebuilding Town-owned facilities, creating proper drainage for our streets and sidewalks, improving our water filtration systems, and replacing obsolete highway machinery with equipment that's more functional and efficient. As Supervisor, I will try my best to invest the dollars necessary to sustain and upgrade our resources and our infrastructure on an annual basis.

PARKS MAINTENANCE AND ENHANCEMENT

Our town's 16 active parks, five athletic fields, and 28 passive parks enhance the lives of our residents in countless ways and have been an integral part of what makes North Hempstead a very special place to live and raise a family. North Hempstead's many green spaces provide us with extraordinary landscapes and function as open-air classrooms for our children. I pledge to make a long-term capital investment in our parks and to ensure that they are all maintained, refurbished, repaired and/or upgraded.

Some parks projects in this year's Capital Plan include the installation of a greenhouse at Clark Botanic Gardens, which will serve as a great educational resource for the Town's school districts and our young families; installing bathrooms, a concession stand and storage area at Manhasset Valley, completing a project that will serve as a focal point for an area of Town that is in great need of sports fields for our children to utilize; and the extension of the Hempstead Harbor Trail, a ¼-mile nature trail that will be extended one extra mile, which continues our commitment to preserving the environment and creates a desirable attraction for residents to enjoy.

PRESERVING TOWN HISTORY

Our Town's historical buildings add to the unique character of our community and serve as reminders of our past. The Capital Plan includes the restoration of the Schumacher House at Clinton G. Martin Park, one of North Hempstead's most cherished historical buildings, for which the Town has already received \$500,000 in grants. I'm proud to announce that using these grants, along with additional funding from the Capital budget, we should see the stabilization and restoration of the historic building in the near future. Once restored, this will serve as a link to the past and our rich heritage.

CLEAN WATER INITIATIVES

Clean water initiatives are a central focus of my administration. Our capital budget focuses on aquatic sand removal projects that help our natural water filtration systems function optimally and protect our aquifers, and that are key to assuring that we all have enough clean water to drink today and in the future. Proposed projects like the aquatic sand removal and remediation of Roslyn Pond will create a long lasting positive impact on the community and the water quality for generations to come.

PUBLIC SAFETY

Protecting the health, safety and welfare of our residents is of paramount importance and the Department of Public Safety plays a vital role in the area of emergency management. The Capital Plan will assist us in our efforts to create a stronger and more effective Public Safety Department in the Town. This year the Capital Plan encompasses much-needed enhancements and updates to both vehicles and security equipment that will enable the Department to work seamlessly with other Public Safety Departments and Offices of Emergency Management.

My goal is to work with my fellow Town officials and the community to decide how best to safeguard and improve our Town's treasured facilities and build to a better future.

SUMMARY OF PROPOSED CAPITAL SPENDING

General Fund

The Five Year Plan will require \$18.25 million in new Town bonding, for an average of \$3.65 million a year and a total expenditure of \$48 million.

Federal and state grants will provide \$26.39 million of the necessary funding. The remaining funds were already borrowed and are available for use on the capital projects listed in this plan.

In developing this Plan, the Town took into account grant payments that have already been awarded, with one exception: the planned expenditure of \$18 million in 2016 to reconstruct the Town Dock. Since the dock's eligibility for FEMA reimbursement has been established, we assume that 100% of the cost will be covered through a combination of FEMA and state grants.

We assume that federal and state grant funding will continue in future years and the Town will be aggressive in applying for all potential additional grants to bring down the costs of these Projects to Town taxpayers.

Town Outside Village

The Five Year Plan will require \$13.6 million in new Town bonding, an average of \$2.7 million per year. The total expenditure is \$22.3 million. Federal and state grants will provide \$4.2 million of the necessary funds.

For this spending, primarily on road projects, we assume that the State will provide approximately \$600,000 in grant support annually in all years of the Plan.

Annual Road Repaying

<u>Scope of work:</u> The Town Highway Department, with assistance of outside contractual services, resurfaces between 37,000 and 40,000 linear feet of roadway annually based on the attached resurfacing schedule.

Source of funds: Resolution 172-2014 – Authorized \$2,000,000 for 2014, \$600,000 from NYS CHIPS Grant.

Estimated Maximum Cost: To resurface this much road it will cost \$2,000,000 annually

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|-------------------------|-----------------|-------------|-------------|-------------|-------------|-------------|-------------------------------------|------------------------|--------------------|--------------------------|
| Annual Road Repaving | 172-2014 | \$2,000,000 | \$2,000,000 | \$2,000,000 | \$2,000,000 | \$2,000,000 | \$600,000/year \$3,000,000 total | \$2,000,000 | | \$2,000,000/year |

Various Highway Equipment

<u>Scope of work:</u> Purchasing various highway equipment for work that is done year round on roadways. This includes equipment such as but is not limited to, brush chippers, tree trucks, sweepers, pay loaders, light duty dump, medium duty dump, skid steer, forestry truck, service truck, stump grinder and heavy duty dump.

- Light Duty Dump (4 wheel-F650)
- 2 Medium Duty Dump (6 wheel)
- Sweeper
- Payloader (tree crew)
- Payloader (Westbury Yard)
- Forestry Truck

Source of funds: Resolution 184-2014 – Authorized \$850,000

Estimated Maximum Cost: Total cost for 2014 is \$850,000

SEQRA: TBR 169-2014

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|------------------------------|--------------|-----------|-----------|-----------|-----------|-----------|----------------|------------------------|--------------------|--------------------------|
| Various Highway Equipment | 184-2014 | \$850,000 | \$799,000 | \$847,000 | \$745,000 | \$875,000 | • | \$850,000 | | \$4,116,000 |

Drainage Improvements at Allen Street and Brian Street, New Hyde Park

<u>Scope of work:</u> includes disconnection of storm water drainage pipe from existing system and installation of additional storm water drainage pipe to connect to drainage system further downstream. Work requires relocation of approximately 330 linear feet of water main.

Source of funds: Prior bond authorization Resolution 254-2012 for \$805,000, of which \$300,000 will be allocated for this project.

*Resolution 254-2012 will also be used for Beachway Outfall Restoration Project and Fairway Drive

Estimated Maximum Cost: Estimated construction cost \$300,000

SEQRA: Type 2 – replacement of a facility in kind.

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|----------------------------------|--------------|-----------|------|------|------|------|-------------|------------------------|-----------------|--------------------------|
| Drainage | | | | | | | | | | |

| Brian Street | 254-2012 | \$300,000 | | | | | | \$105,000 | \$630,705.72 | \$300,000 |

Drainage Improvements at Fairway Drive

<u>Scope of work:</u> Includes the regarding of the sedimentation basin north of Fairway Drive at West Shore Road, to the east of the greek Church, and includes a connection to the drainage system on West Shore Road for overflow to the harbor.

Source of funds: Resolution254-2012 – Authorized \$805,000

*Resolution 254-2012 will also be used for Beachway Outfall Restoration Project and Allen St./Brian St.

Estimated Maximum Cost: Estimated construction cost \$250,000

SEQRA: Type 2 – replacement of a facility in kind.

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|-----------------|--------------|-----------|------|------|------|------|-------------|------------------------|-----------------|--------------------------|
| Drainage | | | | | | | | | | |
| Improvements at | | | | | | | | | | |
| Fairway Drive | 254-2012 | \$250,000 | | | | | | \$105,000 | \$630,705.72 | \$250,000 |

Beachway Outfall Restoration Project (DPW project number 10-09)

<u>Scope of work:</u> Install catch basin filter on the west end of Beachway, remove and replace seaward sections of existing drainage pipe and support on concrete cradle, in conformance with NYSDEC approved plans.

Source of funds: Resolution 254-2012 - Authorized \$805,000 of which \$200,000 will be allocated for this project.

*Resolution 254-2012 will also be used for Allen St./Brian St. Project and Fairway Drive

Estimated Maximum Cost: Estimate for Beachway Outfall Restoration Project (DPW # 10-09) is \$200,000

SEQRA: Type 2 – replacement of a facility in kind.

| | | | | | | | | Authorized | | Total Cost of |
|------------------|--------------|-----------|------|------|------|------|-------------|------------|-----------------|---------------|
| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Unissued | Money Available | Project |

| Restoration | 254-2012 | \$200,000 | | | | | | \$105,000 | \$630,705.72 | \$200,000 |

Essex Court Drainage

<u>Scope of work:</u> Storm water drainage improvements to residential neighborhood, including new drainage catch basins, manholes and interconnecting pipe and road restoration.

Source of funds: Resolution 141-2010 – Authorized \$100,000 for engineering

Resolution 257-2012 - Authorized \$400,000 for construction

Resolution 190-2014 – Authorized \$50,000 for construction

Estimated Maximum Cost: Construction estimate \$400,000 plus \$50,000 for inspection services.

SEQRA: TBR 169-2014

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|--------------|----------------------|-----------|------|------|------|------|----------------|------------------------|-----------------|--------------------------|
| Essex Court | 141-2010 257-2012 | \$450,000 | | | | | | \$50,000 | \$399,487 | \$450,000 |

Improvements to Plandome Road

<u>Scope of work:</u> Traffic calming on Plandome Road including modifications to the intersection of Plandome Road and Manhasset Avenue including traffic signal modifications at intersection.

Source of funds: Resolution 194-2011 - Authorized \$700,000

Estimated Maximum Cost: \$400,000

<u>Grant Funding:</u> NYSDOT SRTS grant for improvements along the length of Plandome Road is not going to be used due to scope changes; roadway has been resurfaced and project reduced to area related to Manhasset Avenue and Plandome Road intersection.

SEQRA: 179-2009

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

| Improvements to | 282-2009, | | | | | | | | | |
| Plandome Road | 194-2011 | \$400,000 | | | | | | | \$699,333.10 | \$400,000 |

Reconstruction of Grand Boulevard, Westbury

<u>Scope of work:</u> Reconstruction of 1.0 mile of roadway through commercial and residential area, including replacement of curbs, sidewalks and street pavement.

Source of funds: Resolution 523-2009 - Authorized \$245,000 for design.

Resolution 15-2013 - Authorized \$2,300,000 for construction

Resolution 193-2014 – Authorized \$700,000

Estimated Maximum Cost: Construction estimate \$3,000,000 plus connstruction phase construction management and inspection services.

Grant funding: NYSDOT to reimburse \$1,173,600 for construction.

SEQRA: TBR 179-2009

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

| Replacement | 14-2013 | \$1,150,000 | | | | | | \$250,000 | \$898,462 | \$1,150,000 |

Salt Dome Repair

Scope of work: Replacement/Repair of the salt dome that collapsed last year.

Source of funds: Resolution 671-2013 – Authorized \$250,000

Estimated Maximum Cost: \$250,000 for work that has already been done in emergency fashion

SEQRA:

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|--------------|--------------|-----------|------|------|------|------|-------------|------------------------|-----------------|--------------------------|
| Salt Dome | 671-2013 | \$250,000 | | | | | | | \$60,231 | \$250,000 |

Construction of a new Highway Dept. Facility at Brush Hollow Road in New Cassel (engineering design)

<u>Scope of work:</u> This project includes the construction of a new building for the Highway department to replace the existing garage in Westbury: proposed structure would include 4 vehicle bays for vehicle storage and a wash area, as well as office space, and restrooms. Site work will include a new salt storage facility, new gasoline dispensing facility as well as material storage areas.

We also suggest incorporating research into potential dedication of a portion of the facility and/or yard area for expansion of the Town's household hazardous waste program (HHW). There is not a facility currently used for HHW in the south east side section of Town, at a minimum this would create one additional location for annual STOP events and has potential to allow dedication of a portion of the yard to be a permanent HHW facility.

Source of funds: Future Bonding Resolutions

<u>Estimated Maximum Cost:</u> Engineering services are estimated at \$300,000 and construction cost preliminarily estimated at \$3,000,000. Exact costs will be laid out in future capital plans once the engineering design is done.

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|----------------------------------|--------------|------|------|------|------|-----------|----------------|------------------------|-----------------|--------------------------|
| Hwy Dept. New Cassel Facility | | | | | | \$300,000 | - | | • | \$300,000 |

Denton Ave. DPW Building HVAC Replacement

Scope of work: Replacement of the original HVAC system in the Denton Ave. DPW Building. Replacement of heating, cooling and domestic hot water systems. Replacement of the HVAC required when the system can no longer be repaired.

Source of funds: Future Bonding Resolutions

Estimated Maximum Cost: The estimated cost for this extensive project is \$1,800,000

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|------------------|--------------|------|------|------|-------------|------|----------------|------------------------|-----------------|--------------------------|
| Denton Ave. HVAC | | | | | | | • | | • | , |
| System | | | | | \$1,800,000 | | | | | \$1,800,000 |

System Wide Upgrades/Maintenance

<u>Scope of work:</u> This project includes all maintenance and upgrades done to any of the Town of North Hempstead's parks. The scope of work is for repair, upgrades and maintenance to fencing, walkways, minor building repairs, electrical upgrades, utility upgrades, bench replacements, equipment replacement and other necessary infrastructure repairs/upgrades/maintenance.

- Caemmerer Park Walkway Replacement
- Fence at 8th & Asbury Ballfield
- Martin Bunky Reid Park Bathroom Roof
- Martin Bunky Reid Park Building Repurposing
- Clinton G. Martin Park Community Building Roof Engineering

Source of funds: Resolution 178-2014 – Authorized \$200,000

Estimated Maximum Cost: This is an annual allotment of money, and in 2014 \$200,000 will be set aside for this ongoing project.

SEQRA: TBR 169-2014

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

Clark Botanic Garden Greenhouse, Albertson

Scope of work: Construction of 4,200 square foot greenhouse with two separate sections for warm and cold climate controls.

Source of funds: Resolution 186-2011 - Authorizing \$250,000

Resolution 191-2014 – Authorizing \$306,850

Estimated Maximum Cost: \$56,850 for engineering design and inspection, current construction estimate \$500,000

Grant funding: DASNY \$250,000

SEQRA: TBR 7-2012

| Replacement | 187-2014 | \$365,000 | | | | | | \$365,000 | | \$365,000 |

Replacement of Parking Lot and walkways at Clark Botanic Garden, Albertson

Scope of work: Replacement of the parking lot and walkways within Clark Botanic Gardens to make them environmentally friendly and also ADA compliant. This work would take place in three phases.

Phase 1 – Reconstruction of the parking with a permeable surface such as pavers. This would also include installing a Rain Garden in the middle of the parking lot for additional drainage purposes.

Phase 2 – Replacement of one of the main walkways, which is informally nicknamed the "Wash-out Road," with a permeable walkway. Due to the impermeability runoff has caused a sharp slope that has caused a dangerous situation and it is impossible for disabled residents to use.

Phase 3 – Replacement of all other walkways and paths within Clark Botanic Gardens with the same permeable walkway used in Phase 2. This would be a 5 year plan that would be installed by multiple jobs replacing 500 feet of walkway per year at an estimated cost of \$50,000 per year.

Source of funds: Future Bonding Resolutions

Estimated Maximum Cost: Initial estimated costs for phase 1 would be \$250,000; phase 2 would be \$150,000; phase 3 would cost \$50,000 per installation

SEQRA: TBR 169-2014

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

Whitney Pond Park Pool

<u>Scope of work:</u> Renovation of existing outdoor pool, including removal of existing facilities and construction of a new pool, mechanical equipment, and other infrastructure needed.

Source of funds: Resolution 100-2013 - Authorized \$125,000

Resolution 174-2014 – Authorized \$3,000,000 – This Bond was Authorized in case of an emergency situation having to do with the pool when the engineering studies are done.

Estimated Maximum Cost: First step in this project is to do an engineering design to determine the scope of the damage to the infrastructure, this will cost approximately \$125,000. After the first step, the Town will determine the entire scope of the project.

Port Washington Baywalk

Scope of work: This is the last stage in the partnership with the Village of Port Washington North to complete the Baywalk which runs along Manhasset Bay sitting along the Sheets Creek Channel. Installation of custom ADA accessible kayak launch platform, gangway, parking and drop off zone, bicycle racks, rain gardens, PEA gravel surface with boulders, boulder retaining wall, and a ADA accessible route to the beach area, among other things.

The funding in years 2017 and 2018 are for future portions of the Port Washington Baywalk which are not associated with the Village of Port Washington North. This includes extending the walkway further South until it meets up with the Town Dock where it would eventually end. This portion would include installing rain gardens, new shades structures, concrete stairway and redoing the existing walkway to be ADA compliant and to match the running theme shown throughout the entire Baywalk.

Source of funds: Future bonding requests

<u>Estimated Maximum Cost:</u> \$250,000 would be the Town of North Hempstead portion. The Village of Port Washington North will also be putting forth \$250,000, as well as the secured grant funding that the village has obtained.

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

Reconstruction of North Hempstead Beach Park Parking Lot

<u>Scope of work:</u> Reconstruction and resurfacing of North Hempstead Beach Park's Parking Lot, including restriping the lot. As a result of the work that was done during Superstorm Sandy cleanup, the parking lot at the park has been severely damaged and is in need of reconstruction. The Town is applying for FEMA reimbursement for this project.

<u>Source of funds:</u> Future Bonding Resolutions: This site was declared as the primary hazard debris mitigation site for the Town. The Town hopes to get full reimbursement from FEMA for any damage and reconstruction that needs to be done at this site.

<u>Estimated Maximum Cost:</u> Reconstruction and resurfacing with restriping estimated \$500,000. This cost may rise depending on the infrastructure damage that was done by the Superstorm Sandy debris that was brought here.

SEQRA: TBD

Fuschillo Park Upgrades

<u>Scope of work:</u> This project includes but is not limited to repair/replacement/upgrades to paths and walkways, fencing, building maintenance, ball field maintenance/upgrades and parking lot repairs. The first project would be to replace the fencing that surrounds the park.

Source of funds: Future Bonding Resolutions

Estimated Maximum Cost: \$80,000 - \$55,000 for the exterior fence repair and replacement - \$25,000 for a drainage design to be done to the ball fields

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|----------------------------|--------------|------|----------|----------|------|------|----------------|------------------------|--------------------|--------------------------|
| Fuschillo Park Upgrades | | | \$55,000 | \$25,000 | | | | | | \$80,000 |

Hempstead Harbor Shoreline Trail

Scope of work: The continuation of a pedestrian hiking trail along the west side of Hempstead Harbor. Phase 1 & 2 completion.

Phase 3 & 4 (2016 and 2017): Scope of work includes continuation of pedestrian trail along the west side of Hempstead Harbor adjacent to West Shore Road; the remaining portion to be constructed had been divided into 2 phases which run from a point opposite Seaview Boulevard with an anticipated end point at the south end of the Solid Waste Transfer Station near the Village of Flower Hill boundary. A route has been previously determined and this portion would need to be re-bid when funds become available.

Source of funds: Resolution 182-2014 – Authorized \$800,000

<u>Estimated Maximum Cost:</u> Total cost of this project is estimated at \$800,000. If the Town Supervisor and Town Councilmembers decide to go forward with more for this project there are two more phases (Phases 3 & 4) that can be completed, funding would have to be authorized for these two phases.

Grant Funding: 2004 Nassau County Bond Act - \$100,000

NYS Parks #C050205 - \$271,000

| Crew House | | | | \$100,000 | | | · | | | \$100,000 |

Martin "Bunky" Reid Park General Improvements

<u>Scope of work:</u> This project includes repair of the walkways, pool deck repairs and renovating the current changing room area for residents. This could also be used to repurpose an existing bathroom as well as increasing bathroom stalls in the main building.

Phase 1 – Repair/Replacement of existing walkways

Phase 2 – Pool Deck Repairs

Phase 3 – Improvements made to already existing changing rooms

Source of funds: Future Bonding Requests

Estimated Maximum Cost: \$350,000

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

| General Improvements | | | \$50,000 | \$150,000 | \$150,000 | | | | | \$350,000 |

North Hempstead's Blueway Trail

Scope of work: The Blueway Trail is a canoe/kayak route that would extend from Little Neck Bay to Hempstead Harbor. Physical construction would mainly consist of signage and proving boat suitable launches. This trail would connect with the Teddy Roosevelt Blueway Trail on the east end. There is a design report of what would need to get done in regards to this project

Source of funds: Future Bonding Requests

Estimated Maximum Cost: If the Town follows the design report that was done last year this project would cost a total of \$1,000,000.

SEQRA: TBD

Compressed Natural Gas Fueling Station

Scope of work: Installing the pump(s), a compressor and bringing a pipe connection off of West Shore Road. The CNG Fueling Station would be situated on SWMA property on West Shore Road. Constructing this station would allow the Town to switch all of the vehicles it owns to natural gas, creating a more environmentally sound fleet of vehicles. It would also allow for surrounding municipalities to enter into Inter-municipal Agreements with the Town to use the fueling station for vehicles they have, defraying costs of the construction.

Source of funds: Resolution 239-2011 – Authorized \$1,500,000

Estimated Maximum Cost: Total cost for this project is estimated at \$1,300,000

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|--------------|--------------|------|------|------|------|-----------|----------------|------------------------|-----------------|--------------------------|
| CNG Station | 239-2011 | | | | | \$300,000 | \$1,000,000 | \$1,500,000 | | \$1,300,000 |

Compressed Natural Gas Fueling Station (engineering design)

<u>Scope of work:</u> Design and engineering design for the creation of a Compressed Natural Gas Fueling Station which will be located on SWMA Grounds

Source of funds: Resolution 239-2011 - Authorized \$1,500,000

<u>Estimated Maximum Cost:</u> Total cost of this is \$440,000, with a grant from the NYS for \$220,000. The Town match for this grant is \$220,000 but much of that is fulfill with the labor that has been put in by the Town employees

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |
|--------------------|--------------|-----------|------|------|------|------|----------------|------------------------|-----------------|--------------------------|
| CNG Station Design | 239-2011 | \$220,000 | | | | | \$220,000 | \$1,500,000 | | \$440,000 |

Alvan Petris Recreational Facility

<u>Scope of work:</u> To rehabilitate and make accessible this recreational facility, including creating an access point for Town vehicles to access the facility for regular maintenance, creating a walkway for residents to take advantage of the land, repaving a basketball court and landscaping much of the land to create picnic areas.

Source of funds: Resolution 181-2014 – Authorized \$500,000

Estimated Maximum Cost: Design and engineering in progress, but estimated maximum costs would be \$500,000

SEQRA: TBR 169-2014

| Streetscape | | \$40,000 | | | | | \$40,000 | | \$40,000 | \$40,000 |

Solid Waste Management Authority

Leachate Waste System

Scope of work: The L4 and L5 Port Washington Landfills generate approximately 2-3 million gallons of leachate every year. Leachate is any liquid that in passing through matter, in this case solid waste, extracts solutes, suspended solids or any other component of the material through which it has passed. Due to its passing through solid waste it collects contaminants present within the buried solid waste which must be treated and/or removed before being ultimately discharged. The leachate collects at the bottom of the landfills and is pumped to the Leachate Pre-Treatment Facility located adjacent to the landfill property. The pre-treatment facility is designed to extract, clean, and aerate the leachate to a standard in which is acceptable for discharge into the Port Washington Water Pollution Control District (PWWPCD) sanitary sewer line. Once at the PWWPCD the leachate is treated further and then discharge by the district.

The Authority's current pre-treatment facility is in need of repair and/or replacement. Over the past several months the Authority has been conducting a pilot study using a reverse osmosis filtration system to determine if this is a viable option for leachate treatment. In addition, the Authority has been researching the cost in repairing the existing facility in case the reverse osmosis system is not sufficient. The Authority has been in touch with all of the regulatory agencies and has been in contact with the PWWPCD in an effort to properly repair the current system.

Source of funds: Resolution 189-2014 – Authorized \$500,000

<u>Estimated Maximum Cost:</u> The current estimated cost of the project is \$500,000. Additional funding may be needed in the future to correct other components of the system.

Solid Waste Management Authority

Landfill Equipment, Vehicles and Repairs to SWMA Buildings

Scope of work: The Authority Administration building has been seeing water intrusion for the past 10 years. The roof has been recently repaired and internal portions of the building are in need repair, such as, walls, doors, ceilings. In addition, the front walk way has experienced a very bad winter and has cracked and shifted causing a tripping hazard and need replacement. The Authority is in need of new vehicles for the fleet as the old vehicles need replacement. The vehicles that are needed are a pool vehicle for the office, a vehicle for our SWMA enforcement employee, and a pick-up truck to replace one of the current exhausted pick-up trucks. The SWMA office personnel is frequently attending meetings at Town Hall, school buildings, and other off-site locations. We currently do not have a pool vehicle. SWMA primarily uses pick-up trucks to conduct its daily routine. Most landfill tasks require the use of a pick-up. In addition, SWMA personnel is frequently moving recycling bins and other items to town buildings and school buildings.

Source of funds: Future Bond Authorizations

Estimated Maximum Cost: The current estimated cost of the project is \$200,000.

SEQRA: TBD

| Equip., Vehicles and Building Maint. | | | \$200,000 | | | | - | | | \$200,000 |

Solid Waste Management Authority

Landfill system improvements

Scope of work: The landfill consistently needs repairs and upgrades to its major operating systems. The landfill gas system will need additional gas wells placed to increase and maintain flow to the flare and landfill gas piping is in need of repair and/or replacement. The Authority is required to properly and efficiently collect landfill gas according to the NYSDEC and the USEPA. The current system has been active for over 20 years and in need of constant repairs. To properly continue to collect landfill gas we must actively seek areas in the landfill to collect the gas from and maintain the collection pipes accordingly. The pump and treatment facility which is also a USEPA required operation must continually collect groundwater for treatment and discharge. The system has 3 extraction wells that pump groundwater from the aquifer below to our treatment building. These 3 pumps need to be replaced because the current pumps have been repaired continuously and are soon to fail. In addition, the electrical wiring system that operates the 3 field pumps has been experiencing failures and will need to be replaced.

Source of funds: Future Bond Authorizations

Estimated Maximum Cost: The current estimated cost of the project is \$300,000.

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

| System Improvements | | | | \$300,000 | | | | | | \$300,000 |

Solid Waste Management Authority

Landfill Maintenance Equipment Purchasing

Scope of work: The Authority is required by NYSDEC to continuously maintain the landfill vegetation to prevent a failure in the landfill cap and to prevent erosion. The Authority will need to purchase of a slope mower to replace existing mower to conduct the vegetation activities. The current slope mower is 10 years old and will need replacement. The purchase of 2 new riding mowers to assist the slope mower will be needed as well. These mowers are 10-12 years old and are past their useful life.

Source of funds: Future Bond Authorizations

Estimated Maximum Cost: The current estimated cost of the project is \$300,000.

SEQRA: TBD

| Equipment | | | | | \$300,000 | | | | | \$300,000 |

Solid Waste Management Authority

Landfill Maintenance Equipment

Scope of work: The authority uses 3 main pieces of heavy machinery, one being a pay loader which we recently purchased and the other 2 being a bull dozer and an excavator. The authority currently owns a bulldozer which has been around since the early 90's and shares an excavator with the highway department. Both of these machines see extended amounts of use and will need to be replaced in several years. This is one item that might have to get moved up the list, but I am hopeful they can last till 2018.

Source of funds: Future Bond Authorizations

<u>Estimated Maximum Cost:</u> The current estimated cost of the project is \$400,000. Additional funding may be needed in the future to correct other components of the system.

Muni-meters for various Town parking lots

<u>Scope of work:</u> Phase I is the installation of muni-meters at two Town managed parking facilities (Albertson and Carle Place) and will address improvements to the parking lot and on-street parking for a total 93 parking spaces. The parking spaces will need resurfacing, increased signage, painted parking spaces, snow and ice removal, security, handicapped parking and parking controls. Phase II will address the parking facility in Roslyn.

Source of funds: Resolution 175-2014 – Authorized \$40,000

<u>Estimated Maximum Cost:</u> The cost for the installation of muni-meters at the Carle Place and Albertson parking facilities would cost approximately \$40,000. Installation of muni-meters at the Roslyn parking facility cost approximately \$45,000 and would be done in 2015.

Patrol Boat Motors

<u>Scope of work:</u> Boat Motors-the Safe Boat (Marine 5) is our primary patrol boat and both motors last year reached their running life cycle. Last year we made an emergency replacement of motor number 1. It is recommended for the engines to be replaced at the same time so we are suggesting to avoid a problem this year is to replace motors 1 and 2 and repurpose the motor purchased last year to go on patrol boat Marine 10. This should give us 8 years of use for the Safe Boat (Marine 5) and Marine 10.

Source of funds: Resolution 176-2014 – Authorized \$46,000

Estimated Maximum Cost: \$46,000, \$20,000 each for the purchase of two Mercury Boat Motors and a cost of \$6,000 to install them

SEQRA: TBR 169-2014

Roslyn Pond Park (Phase I)

Scope of work: To address water quality improvements to the park and its ponds. Three ponds are connected via stream within Gerry Pond Park (Roslyn Pond Park); the intent is to treat storm water runoff and improve water quality, enhance wildlife habitat and add passive recreational opportunity. Sediments will be removed from drainage structures and ponds, native plantings will be installed along perimeter of the ponds and streams to trap overland storm water flow and exclude waterfowl, repairs to spillway and stream channels will be completed, stabilization of stream banks using geotextiles and native plantings. Middle Pond perimeter wall will be repaired, storm water drainage system will be improved including installation of hydrodynamic separator to remove sediments, contaminants and floatables.

Source of funds: Resolution 173-2014 - \$2,500,000

Estimated Maximum Cost: The Town will be dividing this into multiple phases with Phase I costing \$2,500,000, this first phase would cover most of the work that needs to be covered in the grants that have been received, so that when Phase II of this project comes along in 2015 the Town intends on applying for new grants from the State, Federal and County governments. Total cost of all three ponds are estimated at \$9,000,000. The Town intends to move forward with phase I

Hempstead Harbor Dredging

<u>Scope of work:</u> An engineering design for the scope and size of the work that would need to be completed to make the southern half of Hempstead Harbor which would cost \$125,000.

Source of funds: Future Bonding Resolutions; The Town expects to receive FEMA reimbursement for the cost of this project because of the sediment build up that was caused due to Superstorm Sandy

Estimated Maximum Cost: \$125,000 for an engineering design and an estimate of \$1,000,000 for dredging of the harbor.

Grant Funding: \$125,000

SEQRA: TBD

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

Town Dock/Manhasset Bay Dredging

<u>Scope of work:</u> An engineering design that encompasses dredging Manhasset Bay, the restoration of seawalls and repair of the Town Dock. This project not only would create a deep bay to attract more business via waterways but would also reconfigure the Town Dock to be the start of an economic hub for the lower Main Street, Port Washington area. The rehabilitation of this dock would also include installing new ADA compliant walkways, new dock bulkhead and cathodic protection, new parking lot lighting, new drainage system and parking lot, new landscaping, electric pump out station, and other various improvements to make the Town Dock more resilient to future storms.

Source of funds: Future Bonding Resolutions

<u>Estimated Maximum Cost:</u> Estimated costs for this project range from \$10,000,000 up to \$18,000,000. Once an engineering design is done we will know more exact prices. The Town anticipates moving forward with this project if adequate funds from FEMA are received.

SEQRA: TBD

Plandome Park Pond

Scope of work: Dredging of approximately 500 cubic yards of sediment from pond.

Source of funds: Resolution 179-2014 – Authorized \$330,000

Estimated Maximum Cost: construction estimate \$300,000 plus \$30,000 for engineering and inspection services.

SEQRA: TBR 169-2014

| Project Name | Resolution # | 2014 | 2015 | 2016 | 2017 | 2018 | Grant Money | Authorized Unissued | Money Available | Total Cost of Project |

Leeds Pond Dredging

<u>Scope of work:</u> Dredging sediment from pond to improve the ecosystem and natural drainage/filtration system. Phase I will be the preliminary sampling of the sediment and engineering plans to determine total cost.

<u>Source of funds:</u> *Future Bonding Resolutions;* The Town expects to receive FEMA reimbursement for this project due to the sediment build that was caused by Superstorm Sandy.

Estimated Maximum Cost: \$500,000
